

I knew I always wanted to be a dancer. From an early age I danced around the living room any time there was music playing. My dance career took me all over the country and to Europe. The passion of the music of Spain was always one of my driving forces. I feel so fortunate to have had the opportunity to experience such a fulfilling career. But it was more than just the dancing...living the excitement of a life of dance, competitions, and shows was a dream come true. The influence of being surrounded by beautiful ball gowns and dance costumes has influenced my work today.

Now I have turned my creative eye to making jewelry and I feel I have found a new passion. Every year since I started creating pieces I have added new techniques that I have learned along the way. I love to use these techniques such as Viking Knit and Chain Maille to create new and exciting designs. My work is the movement and passion of dance transformed into sparkling wearable art. I know you will enjoy wearing my work.
