

## After Care of Your Tattoo

Remove dressing after 1 hour.

Wash tattoo with anti-bacterial soap and water making sure any traces of blood are gently removed.

Pat dry with clean towel, apply a thin layer of recommended healing cream and cover tattoo with plastic wrap.

Repeat this procedure every 3-4 hours during the day for the first 3 days.

After the 3rd night, stop using the plastic wrap but carry on washing and creaming (Ointment, H2O) for the next 7-10 days, this is

### **VERY IMPORTANT!!!**

After 4-5 days a thin dry layer of skin will start to peel off.

If a heavy scab has formed you have not taken care of your tattoo as explained. This may result in loss of color, scarring and more often than not, a poor looking tattoo.

Do **not** pick or scratch tattoo during healing period.

For the first 2 weeks do not soak tattoo, swim, or subject your tattoo to sunlight. If tattoo is taken care of properly, it should be fully healed after approximately 2 weeks.

**So my friend, I have done my bit for you, now you must make sure you do your bit for you.**

I use the most up to date methods known whilst tattooing. I will therefore not be held responsible for any tattoo after dressing has been applied.

**You only have one skin, bring it to a professional.**
