

Thanks for your interest in my online class Color Light Texture

In this class I cover different ways you can use these special beads that enhance color, reflect light and add texture. There will be videos, photos with notes and I will be available for questions during the duration of the class.

Basic enameling knowledge is needed for this class. The basics will not be covered. I will be kiln firing for this class but torch firing works as well.

You will need basic enameling supplies and a full supply list of everything needed will go out in a month or so. You will have plenty of time to order any needed materials.

This class will run from September 1-17. It is work at your own pace which works out great for my classes since I have students from all around the world. I am limiting the number of students for this class, so sign up early if you are really interested.

My online classes are like a virtual classroom where you can ask questions anytime, share a photo with the class and discuss results or view all the material, and take notes for later work.

They take place in a private group on Facebook. Please friend me so I will be able to enter you into the class on August 31. You will get a notification that you have been added to the group.

The cost for class is \$180.00 and payable through Paypal. Message me with your email address and I will send you a Paypal request to register. This makes it easy to do.

Please let me know if you have any questions.
